---

## Projects & Applications

### Book Review Platform - [Link](#)

- Built a full-stack application with React (TypeScript), Node.js, Express, and MongoDB.
- Implemented JWT-based authentication, protected routes, and secure data flow with bcrypt and express-validator.
- Utilized Redux Toolkit for global state management & React Query for real-time data fetching & caching.
- Followed modular and testable architecture, enabling scalability and maintainability.

### Home-Chef Marketplace Website - [Link](#)

- Developed a React-based frontend using styled-components and React hooks.
- Built backend with Node.js and MongoDB to manage listings and user orders.
- Implemented search and filter functionality based on cuisine and location.
- Designed for UX accessibility and built with RESTful APIs for full-stack integration.

---

## Certificates

Young Professional Course - **TCS iON**

Career Essentials in Software Development - **Microsoft & LinkedIn**

Solutions Architecture Job Simulation - **Forage**

AWS Cloud Practitioner Essentials - **AWS**
